DGE Dan

An update on the generator transaction. I alerted everyone of the reporting requirements, then once it happened, it was beyond my control.

(1)

I asked for a receipt of the money transfer, but after we wrote the club check for the project amount, they did money transfer as described below. We have to wait for May bank statement for the club cancelled check.

I will make sure we get the documents needed but I called my brother at the meeting when I received the check and authorized him to withdraw the equivalent from my personal account and I will pay for any extra cost, if any.

(2)

I alerted our contact on other end that we needed the receipts and proof of purchase and got back two receipts, one for generator and the other for accessories that stated it was a cash payment. Receipts have been uploaded and are attached.

Greetings,

Find attached, the purchase receipt and that of the accessories which includes the transportation from Owerri to Urualla but excluding the installation charges.

I have paid for the generator but I have not taken delivery of same due to the delay in getting the concrete base/platform ready. However the platform/the concrete base is now ready, I will therefore take delivery of the generator tomorrow.

Thanks
