## STATUS SUMMARY

CSA San Diego County is a non-profit organization dedicated to serving the needs of our community. Our anti-human trafficking program is focusing on providing forums to raise awareness on the issue of sex trafficking here in San Diego County. Our forums are serving as a prevention measure for the communities of San Diego County on indicators of sex trafficking. These forums include a screening of a documentary on sex trafficking called "Chosen" and it is followed by a panel discussion featuring sex trafficking survivors, law enforcement, and representatives from the San Diego District Attorney's Office. The goal of this program is to reach as many middle schools and high schools in San Diego County to prevent the trafficking of teenage girls and boys by educating students, members of the community on the identification of potential victims, and recognizing signs of the psychological manipulation, drug use, and violence utilized by pimps. So far we have hosted three educational forums on sex trafficking at schools in San Diego County and have plans to host another three educational forums by the end of May. Overall these events are helping raise awareness and incite communities to get involved in supporting the efforts to eradicate human trafficking in San Diego County.

**CONCLUSIONS/RECOMMENDATIONS**

In looking at the use of the grant funds for the support of this project we feel our results are where we expected them to be at this point but believe there is still room for growth and improvement. One of the disappointments within this program is the ability of schools to fully cooperate and allow us to be candid about the issue. There have been situations where schools will only allow our organization on their campus under specific circumstances or only after they have reviewed and changed our forum to accommodate school policy and code. That being said the success of our program and events are worth the disappointments as participants who show up learn about the issue and really care about preventing the problem from spreading within their community. Through the help of this grant we have been able to expand our reach and connect with new communities about bringing awareness on the issue of human trafficking in San Diego County. We hope to continue to educate those individuals, families, and communities willing to listen to the issue in hopes of continuing to make an impact.
