

ADEFILP is a association that cares and supports handicapped people. Some of that peoples can be a chemical dependency, or may have mental problems. So, the entity makes people feel better because rehabilitates people and give to them dignity and job opportunity to get income, through of collecting and separating reciclable materials. Also the association inserts that people in the labor Market, giving news possibility of life to excluded people from the productive people into society. The project is called "Social Currency", and about 60 families are benefited. Besides of the social aspect, the project also attends the environmental aspect. The proper disposal of waste prevents contamination of soil and water, and the recycling of materials prevents the extraction of new natural resources.

The equipment intended by this global project will facilitate the work of these people, and make possible the increase in production. With this, more people can be helped and the environment will be more preserved. "Recycling waste, saving lives project" need you.
